Daytona Twin Tec LLC - Tech FAQ TC88

Overhead camshaft, commonly abbreviated to OHC, is a valvetrain configuration which places the camshaft of an internal combustion engine of the reciprocating type within the cylinder heads ("above" the pistons and combustion chambers) and drives the valves or lifters in a more direct manner compared with overhead valves (OHV) and pushrods.

Overhead camshaft - Wikipedia

We are partial to this engine and use it in most of our projects. The stock 4 inch stroke is ideal for power output and longevity. The Harley world has been tossing the word "stroker" around for so long that sometimes we think people forget engine basics.
