NASA embraced the ThinkPad on both the International and the Mir Space Stations. It's even in the permanent collection at the Museum of Modern Art in NY. No small wonder then, that we've sold well over 100 million and counting of these reliable devices—thanks in part to loyal T Series customers. View T Series Laptops

History. IBM introduced the T series as part of their ThinkPad brand in 2000. The laptop was meant to cater to users working with multiple networks and in different environments. This resulted in the development of the IBM Embedded Security Subsystem. From the time of its inception, the series was designed to balance speed and mobility.

You don't need an i7. Almost always you don't. This has been true since there were i5 vs i7 laptops. There is no 2018 ThinkPad in the X/P/T series which can't be equipped with at least 16GB RAM.

**X series, P series or T series? : thinkpad - reddit.com**

The E series is built like a standard commercial product, like the Lenovo Ideapads, or your random Dell/HP consumer laptop. The T series is built for business users, and so it has things like drainage channels in the keyboard to better survive spills, a metal rollcage around the internals to provide more durability when dropped, strong metal hinges that won't easily wear out, etc.
