I trying to un-flood my rx8 that was sitting for six months without turning on also burned my old junk 04 started that i never updated until that day i bought a used 07 one and it didn't only fit ...

**DIY: how to unflood an rx8**

The rotary engine of a Mazda RX8 tends to saturate easily if the car turns off before the engine warms. Flooding the cylinders by injecting excessive fuel into the combustion chamber causes the fuel/air ratio to become disproportionate. When this happens, ignition cannot occur, and the engine cannot start. Dealing ...

You will have to actively unflood the vehicle. RX-7's WILL NOT unflood themselves, even if allowed to sit for long periods of time. DO NOT pump the gas pedal at any time while cranking the engine. If the vehicle doesn't start within 5 seconds of cranking it's probably not going to start without unflooding.

Raise the engine speed to 3000RPM Holding the engine speed at 3000RPM, turn the ignition key to the "off" position, While simultaneously depressing the gas pedal all the way down. After the engine has completely wound down, release the gas pedal. RX-8. The RX-8 having a rotary engine, floods like any other rotary engine.

**Rotary Engine Flooding - Rotary Engine Wiki**

I have a 1959 VW beetle with manual choke and standard carburetor. I had been turning it on every two or three days in the cold weather, just to keep the engine running during the winter (it gets down to 20F or less in the Northeast). Yesterday, I turned it on with the manual choke and it turned on right away. I (stupidly) halved the choke right away and it stalled.
