A lawn mower engine is quite simple and basic compared to the one fitted to your car, although the principle of operation is the same. Generally, these type of engines are single cylinder and four-stroke (four cycle) and run on gasoline or "gas", which is known as petrol outside of North America.

### How to Fix a Lawn Mower That Won't Start | Dengarden

I have an ariens 911052 lawn mower with a tecumseh vector 5.5 hp engine. It will start, but runs only about 5-10 seconds before it kills. I filled up the tank with new fuel. I replaced the spark plug, and took apart the carb and looked for obstructions. I put it back together, and it still does the same thing. Does this thing have a fuel filter?
