Good systems engineering is a key factor in enabling good software engineering. The SEBoK explicitly recognizes and embraces the intertwining between systems engineering and software engineering, as well as defining the relationship between the SEBoK and the Guide to the Software Engineering Body of Knowledge (SWEBOK) (Bourque, and Fairley, 2014).

Now also imagine that their system engineering process is all document-based. The original requirements, architecture design, and embedded software specifications are captured in a mix of Excel, Word and Powerpoint. Designing the new functionality requires manual examination, discovery and reconciliation of the implicated sub-systems...
