I have a Onan 2500 LP generator in my Bigfoot camper. This thing has given me nothing but problems. I can't rely on it. When the weather is below zero it doesn't want to start. When it's above zero it starts 8 times out of 10.(At best) I've checked the plug, oil level, vent tube, and checked that the priming solenoid is working. .

Last year we bought a 1999 Lance 1030 truck camper that has an Onan Camp Power 2500 generator, model# 2.5 KVD-2089A. It uses propane, not gasoline. At first it worked great. We started it and ran it for 15-30 minutes a couple times over the winter and everything seemed OK until last week when we were getting it ready to go camping.

Yes, I've had two 3400 watt LP Generacs and one 2500 watt LP Onan in my four Lance campers over the last 20 years. My Lance with the 2500 watt Onan Microlite LP was limited to a 11,000 BTU A/C and if I ran the A/C and the microwave, it was a struggle for the Onan. The 3400 watt Generac runs a 13,500 BTU A/C and the microwave with ease.
