Php Soap Manual

Juste a note to avoid wasting time on php-soap protocol and format support. Until php 5.2.9 (at least) the soap extension is only capable of understanding wsdl 1.0 and 1.1 format. The wsdl 2.0, a W3C recommendation since june 2007, ISN'T supported in php soap extension. (the soap/php_sdl.c source code don't handle wsdl2.0 format)

PHP: SOAP - Manual

As for the KeepAlive, if creating a new separate vhost for the soap api is not possible, you can add this to your existing vhost: BrowserMatch "^PHP-SOAP" nokeepalive where PHP-SOAP is the agent name of your soap client, if you dont know what agent name your client use, just checkout the access.log of your apache.

PHP: SoapClient - Manual

Note that if you should need to set the timeout for your soap request, you can use ini_set to change the value for the default_socket_timeout. I previously used NuSOAP, whose soap client class has a timeout option, and it took me a while to figure out that PHP's soap uses the same socket options as everything else.

PHP: SOAP Functions - Manual

Being new to SOAP, I was searching for a while to find out why my message was getting a response in soapUI, but not with my php code. The specific service I was addressing gives a HTTP 202 Accepted on success (no response), but returns a SOAP message on errors.

PHP: SoapClient::__SoapClient - Manual

SOAP functions may return one, or multiple values. If only one value is returned by the SOAP function, the return value of __soapCall will be a simple value (e.g. an integer, a string, etc). If multiple values are returned, __soapCall will return an associative array of named output parameters. On ...

PHP: SoapClient::__soapCall - Manual

This function is useful to check if the SOAP call failed, but without using exceptions. To use it, create a SoapClient object with the exceptions option set to zero or FALSE . In this case, the SOAP method will return a special SoapFault object which encapsulates the fault details (faultcode, faultstring, faultactor and faultdetails).

PHP: is_soap_fault - Manual

Php Soap Manual Juste a note to avoid wasting time on php-soap protocol and format support. Until php 5.2.9 (at least) the soap extension is only capable of understanding wsdl 1.0 and 1.1 format. The wsdl 2.0, a W3C recommendation since june 2007, ISN'T supported in php soap extension.PHP:
