Thermal Power Plant Interview Mechanical Components of Coal Fired Thermal Power Station: Coal Preparation; i) Fuel preparation system: In coal-fired power stations, the raw feed coal from the coal storage area is first crushed into small pieces and then conveyed to the coal feed hoppers at the

Thermal Power Plant Interview Mechanical Engineer Questions

170+ Power Plant Engineering interview questions and answers for freshers and experienced. Power Plant Engineering technical job interview questions of various companies and by job positions. 9482

Power Plant Engineering Interview Questions, Answers for ...

Answer: In Steam power station, more than 50% of the total heat of combustion is lost as heat rejected to the condenser and the loss is unavoidable as the heat energy cannot be converted in to mechanical energy with out a drop in temperature. Steam in the condenser is at lowest temperature. This is the reason that the thermal efficiency of the power plant is quite low.
