A 170hp TR-67 engine isn't all that streetable in itself, and the rearend would still need to be upgraded to be durable. Again, I'm talking about the car above, that is already highly modified, not a stocker. A well thought out engine swap would be cheaper, and more reliable than a highly modded 2.5 triumph.

I was wondering if anyone knows of a car engine that might bolt onto an existing TR6 tranny. Or one that might require just some minor modifications to attach to the tranny. I do know the engine mounts would be different. I'm thinking maybe a small, reliable, V-6 that I could pick up cheap at the auto graveyard. Thanks, just thinking out loud.
