Fiberglass Mold Free Manual - maleficentgames.net

Each is constructed from hand-laid layers of fiberglass cloth. Fiberglass parts are produced in molds through a manual process known as a lay-up. To prepare the mold, it is coated with a release agent and then a gel coat is applied. This layer is then followed by a coating of resin or epoxy.

FIBERGLASS LAY-UPS - Cimetrix Solutions Inc.

Step 3: Now cut a piece of fiberglass cloth. For this part I recommend CST style G3733 cloth. The fiberglass cloth should be cut on the bias if there are tight corners, this will make fitting the glass into the corners easier. Wet the surface of the mold with a coat of epoxy and lay the dry fiberglass into the mold.

How To Mold A Fiberglass Part Instructions - CST The ...

The fiberglass thickness determines the bevel length and the distance of the cut line in from the corners. The bevel length is at least 12 times the fiberglass thickness. A 12-to-1 bevel allows room for multiple layers of fiberglass fabric and epoxy across the cut line to restore strength to the fiberglass skin.
