Posted: Thu 30 Dec, 2010 11:07 pm: in need of urgent help please ... i just did a head gasket job on Yreg 206 1.1LX and made the silly mistake of not locking or marking anything for the cambelt replacment as i cant see any timing marks or anything anywhere i need to know how to do the job basically, any help or a how to would be greatly appreciated

### **206 1.1 cambelt fitting » Peugeot 206 forum » Peugeot Central**

Looks like the Peugeot 206 is an interference engine, which means there is likely (possibly severe) engine damage if the timing belt broke. It's possible that the belt jumped a tooth or two before breaking, that would cause the 'down on power' situation. You're likely looking at some prohibitively expensive repair costs.

### **Peugeot 206 - Timing Belt : MechanicAdvice - reddit**

The PSA EW/DW engine is a family of straight-4 petrol and diesel engines manufactured by the PSA Group for use in their Peugeot and Citroën automobiles. The EW/DW family was introduced in 1998 as a replacement for the XU engine. The EW/DW uses many parts from the XU, most notably the crankshaft, but is built with lighter materials.

### **PSA EW/DW engine - Wikipedia**

These pages describe the job of replacing the cambelt and waterpump in a 1.4 Tu-engined Peugeot 206. These notes hold good generally for all PSA vehicles fitted with the 8 valve TU engine. These pages do not apply to the 16 valve TU engines. By cambelt replacement standards, this is a nice, easy one and can be fully completed in a morning.
