### **Obtaining a Converged Solution with Abaqus**

The difficulty of obtaining a converged solution for explicit schemes is well known, and results from good damping of high frequency errors, but poor damping of low frequency errors. The initial residual can be reduced quite efficiently up to a certain point, beyond which more and more iterations are required to reduce the residual by a certain amount until a converged solution is obtained.

6 Tips solving non convergence with Abaqus FEA. ... Though the simulation may take long, in some extremely non-linear cases it is just not realistic to obtain a converged solution with Abaqus/Standard. With Abaqus/Explicit, at least you can be certain you won't have any convergence issues. ... Topics: solving non convergence with Abaqus FEA ...

How Can I Get My Contact Problem to Converge? ... Several attempts were required to obtain a converged solution. Attempt 1: The first attempt at a solution did not converge, giving the following error: "An internal solution magnitude limit was exceeded". This type of error, and others such as "Small negative equation solver pivot term ...

e) Try constraining different nodes to remove rigid body motion as both the nodes and constraints can have a large influence in obtaining a converged solution. As long as the constraint is properly applied to eliminate all rigid body rotation and translation modes, the final results will be very similar.
