What is an example of a number relation problem with a ...

Number Sequence Problems: Value Of A Particular Term. The sequence repeats after the fourth term. Step 2: To find the 45th term, get the remainder for $45 \div 4$, which is 1 Step 3: The 45th term is the same as the 1st term, which is 2 Answer: The 45th term is 2.

Number Sequence Word Problems (solutions, examples, videos)

"Number" Word Problems. In the exercise above, one of the answers was one of the solutions to the equation; the other answer was the negative of the other solution to the equation. Warning: Do not assume that you can use both solutions if you just change the signs to be whatever you feel like.

"Number" Word Problems - Purplemath | Home

Example 2. One number exceeds another number by 5. If the sum of the two numbers is 39, find the smaller number. First, circle what you are looking for— the smaller number. Now, let the smaller number equal x . Therefore, the larger number equals $x + 5$. Now, use the problem to set up an equation. Therefore, the smaller number is 17.

Number Problems - CliffsNotes Study Guides

For a given system of linear equations, there are only three possibilities for the solution set of the system: No solution (inconsistent), a unique solution, or infinitely many solutions. The possibilities for the solution set of a homogeneous system is either a unique solution or infinitely many solutions.

Solutions of Systems of Linear Equations - Problems in ...

EXAM 2 SOLUTIONS Problem 1. If R is an equivalence relation on a finite nonempty set A , then the equivalence classes of R all have the same number of elements. Proof. This is false. For example, if $A = \{1, 2, 3\}$ and $R = \{(1, 1), (1, 2), (2, 1), (2, 2), (3, 3)\}$ then $[1] = \{1, 2\}$ has more elements than $[3] = \{3\}$. Problem 2.

EXAM 2 SOLUTIONS - BYU Math

For two consecutive numbers, if the first number is x then the second number is $(x + 1)$ For two consecutive even or odd numbers, if the first number is x then the second number is $(x + 2)$ The square of a number x is x^2 ; The cube of a number x is x^3 ; The ratio of x to y is x/y ; If you want to add more expressions, please use the "Add new ...
