Engine & Repair Troubleshooting - Briggs & Stratton

To troubleshoot a Briggs and Stratton engine, you must check the main components of the engine including fuel, fire and air. Fuel allows the engine to fire. Air facilitates firing and combustion in the engine. Check the fuel component. Begin by pulling the fuel line to the engine's carburetor. Confirm that the fuel flows freely from the hose.

How Do You Troubleshoot a Briggs and Stratton Engine ...

The two common problems when troubleshooting a Briggs & Stratton lawn mower are that the engine doesn't run, or the mower doesn't cut. If the engine doesn't run, there are either one of two things wrong, no fuel is getting into the cylinder to be ignited, or there is no spark to ignite the fuel once it is in the cylinder.
