Replies to: Physics major vs Engineering. The emphasis in engineering and physics is somewhat different. I teach E&M to engineers. When I got to Maxwell's equations and adding the displacement current and how the velocity of light comes out of the equations, the engineering students would just look as if who cares - not the same reaction as in a physics class.

### **Physics major vs Engineering — College Confidential**

Replies to: Physics vs. Engineering Major. Engineering is usually an entirely separate school, with separate admissions and separate core classes. If you're not sure, I would advise applying into the Engineering Schools, as it is typically easier to go Engineering => Physics than to go Physics => Engineering.

### **Physics vs. Engineering Major — College Confidential**

I'll soon be applying to university, and I'm hesitating between a physics degree and an engineering degree. I like physics and maths a lot, and it's what I'm best at. But I've read a lot about how hard it is to get a science related job with a physics degree, especially with just a Bsc.

### **Physics vs Engineering degree | Physics Forums**

The thing is, the end goal of a physicist is quite different than that of an engineer. Similar to what Andy Lim said, physics is definitely more out of the curiosity of science and the limits of nature than anything else. That being said, it does ...

### **Physics Vs Electrical Engineering: How to Pick the Right Major**

'Ello there. I'll be beginning college in a couple of months, and am having trouble deciding between majoring in physics or engineering physics. Which major is more practical? I know that a physics-major would require an advanced degree in order to work as a physicist, while an engineering-major can work as an engineer fresh out of college.

### **Physics vs. Engineering Physics? | Yahoo Answers**

The Engineering Physics major allows students with strong interests in both physics and engineering to concentrate their studies in the common areas of these disciplines. The Engineering Physics major prepares students to pursue careers in industry, either directly after undergraduate studies, or following graduate study in engineering or physics.

### **Engineering Physics Major - Physics**

Best Answer: Physics is one of the most employable and highly paying majors. The only problem is that employers rarely advertise for a physics major, even though they'd be happy to hire one. So it's not quite as easy a job search as for an engineer. With a bachelors in physics, you can work for companies ...

Engineer Vs Physicist (DEATHMATCH!!!) OK...i've seen some friendly comments on the similarities and differences between Engineering and Physics. I would like to hear from people in these fields and studying these fields to get defensive, get personal, but be serious (why not witty and funny

...but mature) about their major/profession/passion.

anyone regret choosing physics as their careers? Imagine you are sipping tea or coffee while discussing various issues with a broad and diverse network of students, colleagues, and friends brought together by the common bond of physics, graduate school, and the physics GRE.

### **anyone regret choosing physics as their careers? - Physics ...**

First, in my opinion as someone who majored in physics for undergrad and moved into an engineering field, physics is a great undergraduate degree if you can stick with it. Everyone I knew in high school went with some engineering field but I didn't feel a particular attraction to any one so I went with physics, and it was perfect for me.

### **Major in Engineering or Physics? : Physics - reddit.com**

Engineering Physics is our core physics curriculum for students at the University of Illinois at Urbana-Champaign. It is a rigorous program in fundamental Physics. Manchester didn't have the electrical engineering major Tritch wanted, so he chose physics. Tritch had always been interested in technology, and as a physics major he learned how different systems worked. First he took his knowledge into a job as an engineer at a company that made machines for food processing plants and medical devices.

### **What Can You Do with a Physics Major? | CollegeXpress**

I feel engineering will still satisfy my love for physics (to an extent), but is a smarter choice in the long term. For example, on SpaceX's website, all of their positions require some sort of engineering degree and it seems very unlikely to get a position with a Physics degree.
