Motor oil has value even after it has been drained from an engine. The oil you take to a collection center to be recycled can be reprocessed and used in furnaces for heat or in power plants to generate electricity for homes, schools, and businesses.

RecycleOil - API

Used motor oil is a valuable resource. Australians are good at recycling used oil, with about 250

million litres of used oil recycled during the 2007-2008 financial year. However, not all used oil is disposed of appropriately. Local governments are helping to conserve a valuable resource and protect the environment by encouraging Australians recycle their used motor oil.

Used motor oil - a valuable resource - Fact sheet

Mineral-based oils or conventional motor oil can be cheap, but it doesn't really offer your engine that much, plus you have to change oil very often. As such, a good compromise would be a synthetic blend or what many would refer to as the semi-synthetic. This type of motor oil is a combination of conventional motor oil and synthetic oil.

Ultimate Guide to Engine Oil - Carbibles

Motor oil is a lubricant used in internal combustion engines, which power cars, motorcycles, lawnmowers, engine-generators, and many other machines. In engines, there are parts which move against each other, and the friction wastes otherwise useful power by converting the kinetic energy to heat.

Motor oil - Wikipedia

Jiffy Lube service centers do more than collect the dirty oil from changes performed at more than 2,000 locations nationwide; they also collect used motor oil brought in by people who change their oil themselves. Then they send this used oil to an oil-recycling center. Motor oil recycling doesn't mean it's placed back into a vehicle. Only ...
