Check this link, hope it helps: Elementary Number Theory, by David M. Burton As said in other answer, refrain from referring to the solutions. However you are old enough to judge what's correct for you so I am posting the link; use it as per your ...

Where can I find the student solution manual for ...

Chegg's number theory experts can provide answers and solutions to virtually any number theory problem, often in as little as 2 hours. Thousands of number theory guided textbook solutions, and expert number theory answers when you need them.

Number Theory Textbook Solutions and Answers | Chegg.com

Solution: Suppose the number has n digits, all k 's. If n is even, then $k - k + k - k + \dots + k - k = 0$ is divisible by 11, so the number is. If n is odd, then $k - k + k - k + \dots - k + k = k$ which is not divisible by 11. So a number whose digits are all the same is divisible by 11 if and only if it has an even number of digits.
