Turbo Harley Engines

Inlet volume is critical with Harley turbos and even more important with 103/110/120/126/131 big inch motors. Add up the turbo discharge volume from the turbo discharge all the way through the intercooler and into the plenum...It has to be a multiple of the engine displacement for the engine to operate efficiently.

RB Racing Harley Turbos

With its smooth, predictable, streetable power this turbo system is a much needed add on for any Harley rider. Whether it be cruising up and down the Boulevard, coast to coast trips or canyon runs, this will put another level of fun to your ride. This system is designed as a direct bolt performance add-on for the stock Harley Davidson engine.

Turbo Systems & Parts - Trask Performance

Here is a general rundown. The engine produces exhaust gases that exit via the exhaust ports of the cylinder head. These gases flow through the exhaust manifold into a turbocharger unit as the exhaust gases enter the turbine housing. The velocity of the exhaust gases spools (spins) a propeller blade type of wheel, called the turbine wheel.
