Canon EOS M - How to use Vintage Manual Lenses

Exposure and Metering. When using a manual focus lens on an EOS body there are two exposure modes which will work correctly, Manual and Aperture Priority. In manual mode you set both the shutter speed (via the EOS body) and the Aperture (via the aperture ring on the lens) yourself.

Canon EOS lens Adapters - Using Manual focus lenses on ...

Specifically for those strange souls who prefer to use old non-autofocus lenses, usually via adaptors, on Canon EOS cameras. There seem to be a few specialist groups covering one type of lens, but I'd like this one to be more general. The EOS system is blessed with being able to be adapted to almost any other common lensmount (although yes, I'll admit it - since the advent of M4/3 and Sony's ...

EOS Cameras and Manual Lenses | Flickr

In the special case of a Canon-compatible manual "preset" lens (of which there must be many still floating around), the concept of "let[ting] the camera use the aperture it felt it saw" may be fairly meaningless.

How to use 6D with manual exposure lenses ... - Canon ...

When to use manual focus. Landscape. When shooting scenery, autofocus will often find something in the foreground, leaving the rest of the scenery blurred, or at least slightly out of focus. In this case, focus on something far in the distance while you're in autofocus -- this will force your lens to focus on infinity.
