The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

History of chemistry - Wikipedia

Polonium is a chemical element with symbol Po and atomic number 84. A rare and highly radioactive metal with no stable isotopes, polonium is chemically similar to selenium and tellurium, though its metallic character resembles that of its horizontal neighbors in the periodic table: thallium, lead, and bismuth. Due to the short half-life of all its isotopes, its natural occurrence is limited to ...

Polonium - Wikipedia

the blarney: the science: When Crystal Energy is added to water it makes it "The Most Biologically Active Water in The World", according to Dr. Patrick Flanagan. An utterly meaningless statement. A solution of sodium cyanide would be an even more "biologically active" water!. When Crystal Energy made with Flanagan Microclusters added to water ---water molecules which are clumped together and ...

Flanagan's shenanigans: hydride ion crackpot chemistry

Addenda: 298a: The pieces of SCP-298 are not to be destroyed. Further research into the extraphysical mechanism behind the sudden change in the physical properties of the blood of humans must be undertaken.

I have some really exciting news for you - a breakthrough in blood sugar science that no one saw coming. So, if you're bending over backwards to "hit your numbers" at your annual checkup... you've given up every delectable sweet... you're pounding the pavement, sweating in the gym,

taking your vitamins and still not getting the results you want...

FSPNutritionals' Gluco-Control Plus

Dr. Velasquez now sat in the chair, picking at the scab on her knuckle as Agent Curie droned on. "... and woke up SCP-3233, paid off her little critters, smuggled them into Site-45, had them steal the Claw, seduced SCP-2719 to get inside the Plague Doctor's cell, and finished it off." Agent Curie leaned in to face the suspect.

Why coffee? [2] In 1981, for instance, Dr. Lee Wattenberg and his colleagues were able to show that substances found in coffee — kahweol and cafestol palmitate — promote the activity of a key enzyme system, glutathione S-transferase, above the norm. This system detoxifies a vast array of electrophiles from the bloodstream and, according to GarHildenbrand of the Gerson Institute, "must be ...

The year 2002 could probably be described as "the best of times, and the worst of times." On one level, Korean cinema continued its breathtaking run of popularity with local audiences, winning over a 45.2% market share in Seoul, only slightly lower than the 46.1% recorded in 2001 (market share in Korea as a whole was likely higher, but harder to measure).
