### **Manual Versus TTL - Digital Photo Magazine - dpmag.com**

Canon's DSLR cameras use a pre flash to determine the correct flash exposure, a system known as E-TTL. Way back in time, Canon EOS film cameras used a system called TTL flash where the flash was metered off the film surface during the actual exposure. Several of the Speedlite EX series of flashes ...

### **The difference between E-TTL & TTL for Canon flash**

While all TTL flashes will support manual operation, not every manual flash will offer TTL capability. If you don't need TTL, you may be able to save a few bucks on a manual-only light. Con: TTL Is Inconsistent. Because TTL metering changes dynamically with the reflectivity of your subject, the images you take can vary from shot to shot.

### **The Pros and Cons of TTL vs. Manual Flash**

I personally use only manual flash off-camera because TTL remote triggers are too expensive for me, but if I want to be sure I get a good exposure on the first shot I'll use a TTL flash on camera (and use reflectors and flags to control the direction of the light)

### **flash - What are the advantages of TTL over manual mode ...**

Someone with a D60 or access to the instruction manual might be able to confirm this, but some Nikon dSLRs and flash units have an "FV Lock" feature that can minimize some of the variables associated with TTL flash. Usually Nikon's TTL flash works very well, but there are situations where it can be fooled.
