PHP: `PHP Manual` - Manual

`version_compare()` compares two "PHP-standardized" version number strings. The function first replaces `_`, `-` and `+` with a dot `.` in the version strings and also inserts dots `.` before and after any non number so that for example `'4.3.2RC1'` becomes `'4.3.2.RC.1'`. Then it compares the parts starting from left to right. If a part contains special version strings these are handled in the following order ...
