The other engine is currently being restored. The crankshaft of the second one was rotated with the barring engine about half a revolution, after no use since 1985. Of course it is a triple expansion steam engine, and it now is run on a newish boiler which is gas fired. Unfortunately the old Lancashire (?) boilers were scrapped.

The book he refers to, ISBN 978-3-7883-0653-3, is the plans for a two-cylinder, double-acting steam engine with "Marshall Control" (I don't know a thing about steam engines, so that may be too literal). So, not a triple expansion. The title is Dampf 32, which makes me think there are at least 31 other projects.

CNC'ing a Triple Expansion Marine Steam Engine ...

I'm on the lookout for some plans of a triple expansion marine engine like the Liberty ship engines. (vertical column type) I have a preference for bar stock, but a casting type plan would be ok. The initial model would be a small display engine, but I'm not ruling out one for a steam launch in the years to come. Cheers Phil
