Manually Operated Directional Valves. Manually operated directional valves are now available from Sun in a wide range of functional variations and flow capacities. Flow rates to 120 gpm (480 L/min.) The following table includes an overview of Sun's manually operated valves along with links to additional detailed information.

Manually Operated Directional Valves | Sun Hydraulics

Manually operated valves are used in all industrial sectors, as well as in the commercial trades. They are used to carry out simple processes such as clamping or closing safety doors. Depending on the desired actuation (pushing, rotating/swivelling or tilt ing), the valves are either detenting or non-detenting.
