University of Chicago School Mathematics Project (UCSMP) Algebra, designed to increase students' skills in algebra, is appropriate for students in grades 7-10, depending on the students' incoming knowledge. This one-year course highlights applications, uses statistics and geometry to develop the algebra of linear equations and inequalities, and includes probability concepts in conjunction with algebraic fractions.

UCSMP Advanced Algebra. Main goal: The main goal of UCSMP Advanced Algebra is to improve and extend the algebra skills of students accumulated during the previous years of study to accommodate the topics traditional to a second algebra course. Main theme I: Functions provide a unifying theme throughout. Linear, quadratic, exponential, logarithmic, and trigonometric functions are covered, as well as functions of variation, sequences, and transformations.

UCSMP Grades 6-12. Some middle schools have been asking for a text to precede Transition Mathematics (in the style of that book) since the first edition appeared in the 1980s. Pre-Transition Mathematics fills that need. It is designed to take average students from a strong 5th grade curriculum, such as Everyday Mathematics 5,...

### **UCSMP Grades 6-12 Overview - UCSMP**

The University of Chicago School Mathematics Project (UCSMP) math program has produced six texts teaching integrated mathematics for junior and senior high levels. The first book in the series, a pre-algebra text, is titled Transition Mathematics. This Algebra text is second in the series. This is probably the best and most comprehensive of the new math programs based on the new math

standards.

(Remember that Algebra II is the second in Saxon's high school series, so we must compare this text partially to Saxon's Algebra II and partially to Saxon's Advanced Math.) Advanced Algebra is similar in design to the UCSMP Algebra course, incorporating practical application, mathematical thinking, and challenging skills.
