Foundation engineering applies the knowledge of soil mechanics, rock mechanics, geology, and structural engineering to the design and construction of foundations for buildings and other structures. The most basic aspect of foundation engineering deals with the selection of the type of foundation, such as using a shallow or deep foundation system.

Geo Technical Engineering and Foundation Engineering ...

Deep Foundations. Several Types of Deep Foundations Are Discussed Below: 1. Pile Foundation. Pile foundation is a common type of deep foundation. They are used to reduce cost and when as per soil condition considerations, it is desirable to transmit loads to soil strata which are beyond the reach of shallow foundations.
