Traxxas specs on both the xl5 and titan say it can't handle over 8.4v so it rules 3s out doesn't it? I have read the esc won't even turn on with 3s due to voltage protection. I have never tried it but that's what I have read on traxxas site and been told at the local tracks. Sent from my SM-G955U using Tapatalk

The manual is well enough written that you should be able to figure it out. It does have a Traxxas plug for the battery side (TRX). If your battery has a different connector, either chop this one off and put something else on, or fix the leads from your battery. The motor side has female banana connectors, so you will need male ones on the ...
