I have a grandfather clock with urgos works that stopped working some time ago after a move. I am now interested in getting it working again and have been researching online. I found an earlier question that was pretty much the problem I'm experiencing (doesn't chime and only the middle weight moves).

We just rescued an old Grandfather clock from the Salvation Army store that is in need of some love. What I know about Grandfather clocks is what I've been able to summize from the internet over the last few days. It is an Urgos 9-tube movement. Our clock is missing weights.

#### Picture of Urgos Grandfather Clock Movement Parts ...

It can be much more expensive to overhaul a movement because of the extensive time it takes to disassemble the movement, work on it, and then put it all back together again. Forget about the movement being sentimental when it comes to replacing it, keep the case sentimental, not the Weight Driven Clocks movement.

#### Weight Driven Clocks - clockworks.com

I have a 1978 Limited edition Ridgeway Grandfather Clock that has an Urgos movement with day date month and moon phase, clock seems to kepp perfect time I have had it for year and everything works except for the day date, month moon.
