(75 replies) The bg build of the PHP Manual is broken, so it does not validate or build. Please fix it! ;) Attached is the full log Love, The docs.php.net server

This PHP Manual build is broken - Grokbase

Note: Also note that foreach operates on a copy of the specified array and not the array itself. Therefore, the array pointer is not modified as with the each() construct, and changes to the array element returned are not reflected in the original array. However, the internal pointer of the original array is advanced with the processing of the array.

Description. Sets the cell's "background color".The term "background color" is misleading.Here, "background" means the bottom layer of a cell's background.This method only comes into play when creating patterns via the setPattern() method. In general, chances are you are more interested in using the setFgColor() method. The example entitled "How background and foreground colors interact with ...
